- [Estes Community Center in Chase City, VA](#)
 - o Clinical Facilities at a variety of locations listed above within a radius around Chase City.

Length of Program

The entire program is 67 credits. The clinical portion of the Associate's in Applied Science Degree Program lasts 2 years or 4 semesters. Programs at all of our sites begin each fall semester, with classes starting in late August. Any developmental Math, English, Biology, or Chemistry course students must complete based on their Community College Placement Scores and high school transcript must be completed prior to enrollment. There are also prerequisite general education courses that must be completed to be considered for admission into the Clinical Nursing Program. Therefore, most students take longer than 2 years to complete the required 67 credits, typically 2.5 to 3 years.

The Weekend clinical program is complete in 4 consecutive semesters, or about 16 months.
